

Analytical Service :
"To meet your expectations"

Relyx's have qualified and experienced analytical chemists can deliver efficient and top quality analytical method development & validation of active pharmaceutical ingredients (API'S), bulk drugs, intermediate and fine chemicals.

Once we develop a method, we can assist with method validation and transfer to a third party or to the client's laboratory. We will provide necessary guidance on the validation experiments required in compliance with cGMP.

Relyx offer analytical method development and validation for ;

- ⇒ **Assay**
- ⇒ **Purity**
- ⇒ **Related substance**
- ⇒ **Residual solvent**
- ⇒ **Impurity identification and quantitation**
- ⇒ **Cleaning validation**

RELYX
RESEARCH TECHNOLOGIES

**To Accelerate Your
Internal Research.**

CONTRACT RESEARCH & COSTOM SYNTHESIS

About Us: Relyx research technology is one of the fastest growing organizations in the field of Custom synthesis and Contract research as well as Analytical method development and Validation service.

We are committed to providing high-quality custom synthesis and contract research services necessary to accelerate your internal research and development programs within the agreed timeline.

Our highly trained and skillful scientist team assists the **Pharmaceutical, Agrichemical, Specialty chemical and Dyes industries** in the early phase production of molecules for research and development at the milligram to kilogram scale in our synthesis lab.

#We will work with you to select a combination of services to fit your competitive pricing objectives to get the work done within a reasonable time period with desirable quality.

Contract Research:

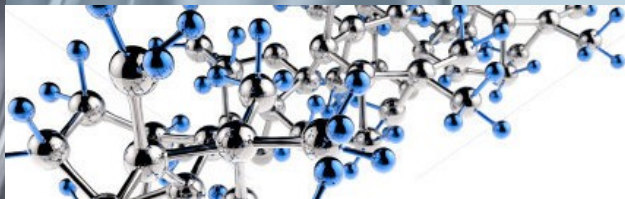

"To accelerate your internal research"

Relyx offers contract research and development service to accelerate your research program for developing new organic molecules.

We offer evaluation of synthetic routes for the optimization of process parameters on lab scale and development of commercially feasible processes for drugs, intermediates and specialty chemicals.

Relyx offers contract research & development services for;

- ⇒ **Novel route scouting**
- ⇒ **Process optimization and cost reduction**
- ⇒ **Process design and scale-up**
- ⇒ **Increasing process efficiency, yield and throughput**
- ⇒ **Design and Synthesis of new chemical entities(NCE'S) and New Molecular Entities(NME'S)**
- ⇒ **Research and Synthesis of Controlled Substances**
- ⇒ **Tech transfer services**

Custom Synthesis:

"Services before your project begins"

Relyx's are providing synthesis of a broad spectrum of organic and inorganic compounds at milligram to kilogram quantities.

Relyx delivers high-quality custom synthesis services necessary to accelerate your research and development programs.

Our highly qualified team provides the skill, experience and chemistry support services for the synthesis of targeted compounds and other compounds, multiple chemistry, scalable, robust and cost-effective processes for your needs..

Our mission is to develop partnerships with innovative companies, providing custom synthesis of small scale :

APIs, Intermediates, Fine chemicals, Agrochemicals, Dyes, Reference standards, and Impurities.
